Thank you for your request by email and our follow up phone call with regard to the restoration of two statues: Hans Christian Heg and Forward.

Based on the images and our phone conversation the general costs are as follows:

Restoration by surface chasing and full attachment Heg \$17,000.00
Remodeling / Rubber Mold of Heg head (if needed) \$10,000.00
Removal of bronze base from pedestal supervision only \$1,000.00 with local contractor.

Restoration by surface chasing Forward \$15,000.00
Remodeling / Rubber Mold Forward finger based on images of original \$1,000.00
Decorative Nuts (from mold created on original) \$1,000.00

My notes from 1996 indicate that we delivered the molds but I cannot locate the address. If they can be located they can be used for finger and decorative nuts.

Above includes patina restoration.

Costs are estimates to be evaluated upon seeing work in person should we move forward with inspections. Let me know if a visit is required in order to continue.

Delivery to NYC approximately \$5,000.00

Delivery to Madison WI approximately \$5,000.00

Supervision of Installation if requested \$2,500.00

Local installation services and crane services should be coordinated by your office.

Any additional insurances required beyond our current in hand policies will be added to any contract and billed at cost.

Estimated lump sum from above \$57,500.00.

I hope this information is helpful.

Sincerely,

Jeffrey Spring
